

SPEAR DVD LIBRARY

Four categories and a lifetime of skills

THE new SHAPE of KNOWLEDGE

Four categories and a lifetime of skills

Dr. Frank Spear, DDS, MSD is the ultimate authority in creating natural beauty in restorative dentistry. Now you can learn from the best with Dr. Spear's extensive DVD library featuring insight into implants & bridges, restoration, occlusion and patient education. Fine tune your techniques and patient communication skills as your knowledge and confidence increase with each video.

IMPLANTS/BRIDGES

- Immediate Single Tooth Implants** \$209
Treatment planning
Retaining soft tissue esthetics after extraction is the challenge of single tooth anterior implants. Dr. Spear discusses different approaches and strategies to achieve optimal appearance with less treatment time and discomfort.
- Single Tooth Anterior Implants** \$209
Placement considerations
This DVD examines surgically placing and restoring single tooth anterior implants. The placement of the implant impacts the final esthetic result and soft tissue longevity. Surgical guide construction and adjunctive procedures are demonstrated.
- Multiple Missing Anterior Teeth – 2 DVD set** \$325
Esthetic management
Dr. Spear addresses the esthetic challenges posed by replacing multiple teeth. In this two-disc set, several cases are reviewed to demonstrate different treatment options, including implant placement, pontics use and retaining strategic teeth to support hard and soft tissues.
- Single Tooth Implant** \$139
Temporaries
Dr. Spear explains why using an implant temporary is the key to molding soft tissue and how good contour creates ideal gingival levels. He covers provisional fabrication using direct composite, a denture tooth, and a matrix as well as the advantages of screw-retained provisionals.
- Ovate Pontics** \$139
Soft tissue restorative considerations
This highly informative DVD tackles the challenge of managing ovate pontic design to achieve an exceptional result. Dr. Spear shares his preferred approach to communicating ovate pontics to the technician.

CASE PRESENTATION

- Case Presentations Using Microsoft® PowerPoint®** \$209
Sit down with Dr. Spear as he walks you through setting up your computer, storing and managing images, and using PowerPoint to create visual impact for exceptional case presentation. Patients who understand what you see will better follow your recommendations. Implement the powerful tools in this DVD, and change the way you interact with patients when you discuss treatment.
- Digital Camera Selection & Use** \$209
Dr. Spear discusses selecting the appropriate camera for your needs and explains camera settings required to set up your camera for office use. After watching this video, you'll be amazed at how digital photography will help you develop more complete treatment plans and communicate more clearly with patients.
- Color Managing Digital Photography** \$139
For the dental office
Dr. Spear explains the often confusing subject of managing color in digital photography cameras, monitors and printers. Understanding "how color works" lets you create color-accurate electronic/print images for the most precise and effective lab communication. For presentations using photography, correct color can mean the difference between the result being seen as acceptable or *excellent*.
- Perfecting Images Using Adobe® Photoshop®** \$139
Adobe Photoshop is the graphic design industry standard for image manipulation. Discover how to use Photoshop in your practice to refine images for precision and esthetics. Image is everything. Perfected images improve patient communication, lab communication, and your image in the dental community.
- Case Presentation – 3 DVD set** \$350
The process in detail
"How do I get my patients to accept treatment?" Dr. Spear examines one of the major challenges of dentistry as he shares his immense experience in increasing case acceptance. Learn how to create patient curiosity during exam and treatment planning so that your patients will accept your best dentistry. This DVD will change your practice success. More importantly, it will change your own satisfaction in dentistry.

RESTORATIVE

- Material Selection – 3 DVD set** \$425
Indirect anterior restorations
This comprehensive three-disc set evaluates and reviews products, with clinical photography illustrating case examples and possibilities. A sample of topics include: homogenous & non-homogenous materials, failure/success rates and alternative fabrication method CEREC inLab®.
- Endodontically Treated Teeth** \$209
Esthetic management
Dr. Spear discusses the restoration of the endodontically treated tooth. The historical role of posts is compared to the current guidelines for post placement. Post types are reviewed, as are the cementation process, build-up materials and internal bleaching.
- Preparing Anterior Esthetic Crowns** \$139
Dr. Spear shares his expertise in planning and preparing anterior full crowns with a variety of materials to create the ideal combination of function and esthetics. The entire procedure is demonstrated, including preparation, design, model demonstration, and live patient video.
- Cementing Anterior Esthetic Crowns** \$139
Dr. Spear discusses anterior crown cementation with both metal ceramic and all-ceramic crowns. Cementation choices are reviewed, and two cases are demonstrated using light and dual cured resin cement and resin-reinforced glass ionomer cement.
- Preparing Porcelain Veneers** \$139
Techniques & Materials
In-office demonstrations of actual treatment on patients reveal the decision process around designing porcelain veneers and preparing teeth appropriately to receive them. Dr. Spear explains the use and advantages of a bonded matrix to evaluate the facial esthetics, phonetics, and occlusion before beginning tooth preparation. The end results are esthetically pleasing, occlusally functional veneers, and highly satisfied patients.
- Cementing Porcelain Veneers** \$139
Techniques & Materials
Dr. Spear shares more than 20 years of practical experience in seating veneers. Setting up the operator, removing provisionals, safely trying in fragile veneers, color compensating for a perfect shade match, choosing the right bonding system, selecting the appropriate cement, and easy clean-up techniques are presented in easy steps that you can implement immediately. Special attention is paid to occlusal, esthetic and phonetic refinements that create a successful seating appointment.
- Veneer Temporaries** \$209
Fabrication
Although creating exquisite veneer temporaries is difficult and often frustrating, it remains a vital part in communicating with both patient and lab. Watch as Dr. Spear designs, fabricates, trims, polishes, and customizes exquisite anterior veneer temporaries. After watching this DVD, you'll look forward to your next veneer case!
- Anterior Full Crown Temporaries** \$209
Anterior full crown temporaries require more than good fit, acceptable occlusion, and good contact. When correctly constructed, the anterior full crown temporary serves as a guide to your technician for form, occlusion, and even color. Dr. Spear demonstrates the steps necessary to make your anterior full crown temporaries extraordinary.

OCCUSION

- The Occlusal Appliance** \$139
Making the correct choice
Dr. Spear discusses the five major types of occlusal appliances, the four reasons for using an appliance, and how to choose accordingly. Footage of an actual clinical consultation shows that diagnosis is the key to managing pain.
- Restoring Worn Dentition – 5 DVD set** \$650
Diagnosis and treatment planning
In this best-selling DVD series, Dr. Spear shares his professional thought processes to illustrate how he looks at and thinks about managing patients with severe tooth wear. Learn how to confidently and effectively combine esthetics and function in restoring damaged dentition.
- Maxillary Night Guard** \$139
Insertion & equilibration
In this presentation, Dr. Spear expands upon the insertion and equilibration of a maxillary full arch appliance. The laboratory steps in smoothing and polishing are demonstrated, as well as patient instructions.
- Mounting and Evaluating Models** \$209
Occlusal analysis
If you hated mounting models in dental school, you will love this video. Dr. Spear shows you how to get excellent casts mounted appropriately on the articulator. You'll learn easy to follow, step-by-step instructions that will have you and your staff mounting cases in a very short time.
- Clinical Exam** \$139
Joint and muscles
This DVD focuses on joint and muscle examination and how to identify patients that would be "high risk" for successful treatment. Dr. Spear demonstrates how to perform a five to ten minute clinical exam, and what to look and listen for throughout the procedure.
- Centric Relation Bite Records** \$139
This video will remove the mystique and uncertainty to making accurate centric relation bite records, which are essential in developing a successful treatment plan. Dr. Spear demonstrates three methods in making accurate, usable bite records – one of which you're sure to incorporate into your practice.
- Facebow Transfer** \$139
How-to on using a technique often taught in dental school but rarely used in practice. Learn the ins and outs of using a facebow transfer to develop a successful treatment plan.
- The Anterior Bite Plane Appliance** \$139
Indications, fabrication and adjustment
You'll construct better anterior appliances after watching this live-patient demonstration detailing the intricate steps of fabrication, try-in, adjustment and patient care instructions.
