SPEAR STUDY CLUBS
FOR INTERDISCIPLINARY EXCELLENCE

2010

SPEAR STUDY CLUBS ARE THE NEWEST INITIATIVE IN DENTISTRY...

...with a goal of helping restorative dentists and specialists work more closely together to create a quantum leap in the quality of interdisciplinary dentistry. Renowned restorative dentist, Frank Spear, D.D.S., M.S.D., has been facilitating study clubs for years, and has experienced first-hand the positive impact they have on the whole team.

WHY SPEAR STUDY CLUBS

By joining a Spear Study Club, you are dedicating yourself to the development of a higher level of clinical, diagnostic, treatment planning and value creation skills. Work side-by-side with a group of dentists and a specialist leader, treatment planning eight interdisciplinary case studies throughout the year. By pooling knowledge and resources, the entire group's skills, competency and confidence will soar.

A Spear Study Club can be the most effective and enjoyable educational experience of your professional career. Small groups of committed members with a shared vision, purpose and learning objectives have the greatest chances of practicing at the very highest levels in our profession.

- A first-class clinical agenda based on case studies by Steve Ratcliff, D.D.S., M.S., Bob Winter, D.D.S., Gregg Kinzer, D.D.S., M.S.D. and other leading clinicians – it's like having the experts at your club in person
- Studies are directed and narrated by noted study club authority, Steve Ratcliff
- A kick-off event at a Spear seminar presented at Scottsdale Center for Dentistry
- Practical learning you can apply immediately to build your practice
- Opportunity to create deep and ongoing bonds of friendship and trust with colleagues
- A Spear Study Club password-protected Web microsite with tutorials, discussion boards and upload capabilities
- Support group to whom you can turn for help, tips, suggestions and discussion
- A progression of learning that will have you practicing increasingly higher levels of comprehensive care
- Deeper understanding of how working with specialists can make you more successful
- Better outcomes and happier patients!

SPEAR EDUCATION COURSES

Your first Spear Education course is just the first step on an exciting, lifelong journey of learning, which will significantly affect the future of your practice. Raise the bar of knowledge, experience and confidence, and you will quickly distinguish yourself from your peers.

Following your first course, you are encouraged to attend the next seminar in the Spear Education continuum, *Facially Generated Treatment Planning*. Whether you attend individually or with a member of your Study Group, you'll return to your practice newly energized, and see the benefits to your practice immediately.

FACIALLY GENERATED TREATMENT PLANNING

A systematic, step-by-step approach to examination, diagnosis, treatment options, treatment plans and patient communication. With the confidence you attain from this course, you'll effectively address patient concerns and perform more of the dentistry you like because you'll diagnose and present it with assurance.

SEMINAR TUITION
INCLUDED
FOR SPEAR STUDY CLUB MEMBERS

AS A SPEAR STUDY CLUB MEMBER,
YOU & YOUR COLLEAGUES WILL ATTEND ONE OF THE FOLLOWING SPEAR SEMINARS

MASTERY OF ESTHETICS ON IMPLANTS AND TEETH

With so many materials choices in restorative and esthetic dentistry today, how do you know what to use for the ideal combination of function and esthetics? This course includes a comprehensive materials evaluation so you can make the right materials choices to ensure success and patient satisfaction. Understand prep design, how facial evaluations alter esthetic planning, the five key esthetic factors that must be addressed in planning, and the role of photography in diagnosis and treatment planning.

TREATING THE WORN DENTITION

Wear patients present a dangerous mix of esthetic and functional problems that cause dentists to hesitate, even referring patients though they possess the clinical skills necessary for successful treatment. Learn the diagnostic, planning and treatment skills necessary to successfully treat a severely worn dentition. Recognize the causes of wear, evaluate vertical dimension, and know when it must or must not be changed.

DEMISTIFYING OCCLUSION

If you are already performing complex dentistry, or if you want to start but are afraid of your dentistry failing, you need *Demystifying Occlusion*. This course will help you understand how to evaluate risk from occlusion to prevent functional failure. Your confidence in treating occlusal issues will steadily rise as you learn to create more predictable restorative results.
